

# npm run all

run the world, one command at a time

@bobyrito - ParisJS#46

# What is npm run?

<https://docs.npmjs.com/cli/run-script>

# It executes commands

- defined in `scripts` object of the `package.json`
- the commands are run with :  
`npm run command`

# BUT WHY?

since I have everything I already need with my build-  
system X!

Node comes with  
NPM

Runs node modules

Straightforward

Up to date

Feature full

# Demo time!

Live coding FTW or not

# Thanks

@boblito - Paris JS 04/2015
